

Applied Composites is an industry leading MRO provider specializing in professional radome repair for owners and operators of commercial, regional, business, and military aircraft

Our pool of flightworthy loaner radomes keep your aircraft operational while repairs are performed in-house by our qualified staff of A&P technicians.

We have multiple King Air & Super King Air radomes in stock and ready for exchange at any time.

Applied Composites performs FAA approved & RTCA compliant transmissivity testing on radomes of all sizes within our 50'L x 17'W x 17'T Anechoic Chamber

### Key Capabilities

- In-House Engineering
- Tooling Design & Manufacture
- Metallic & Composite Structural Repair
- NDT Inspection & Transmissivity Testing

Applied Composites also offers transmissivity testing on a "test-only" basis for customers with internal repair capabilities

**One Source. Diverse Capabilities.**
